Tasks

1. **Format** the header row (bold + color).
2. Format **MonthlyIncome** as currency (Indian Rupees)
3. Create new column as **Education details** based on existing **Education** column as below.
   1 = 'Below College'
   2 = 'College'
   3 = 'Bachelor'
   4 = 'Master'
   5 = 'Doctor'
4. Sort employees by **YearsAtCompany** (descending), then sort by **Department** A–Z.
5. Filter gender = “Female” and Department = “Research & Development”.
6. Filter monthly income **> ₹10,000** AND **OverTime = Yes**.
7. Add a new column named **'Income with Bonus**' and calculate it as the monthly income plus a 1.5% bonus of the original monthly income.
8. Count employees in **Sales**.
9. Sum **MonthlyIncome** for employees aged > 35.
10. Create new column as **"Seniority"** based on TotalWorkingYear column. And fill it with this condition: If TotalWorkingYears ≥ 10 → “Senior” else “Junior”.
11. How many employees work in the **"Research & Development"** department?
12. Calculate the **total number of employees** who left the company (Attrition = Yes).
13. Convert all **department names** to uppercase.
14. Calculate **total number** of male and female employees
15. Use IF to label employees earning **above 10,000** as "High Earner", else "Low Earner" in new column **based on monthly income**.
16. How many employees are earning **between 4000 and 6000**?
17. Sum the total income of employees from **'Human Resources'** department.
18. How many male employees are there in the Sales department who earn more than 5000 and work overtime?
